LifeWatch Services, Inc. on track to surpass total 2007 ACT billable patients in mid April of 2008

CHICAGO, IL. - LifeWatch Corp. announces that LifeStar ACT Ambulatory Cardiac Telemetry services are on track to surpass its total 2007 ACT billable patients by mid-April 2008. The ACT service is now being utilized by 50 of the top ranking hospitals and medical centers in the USA.

LifeWatch launched its LifeStar ACT Ambulatory Cardiac Telemetry system in January of 2007, thus becoming the first Independent Diagnostic Testing Facility (IDTF) to offer its clients a comprehensive Cardiac Arrhythmia Monitoring service offering. LifeWatch prides itself on its quality and industry credentials. All of the necessary approvals to market the LifeStar ACT service are in place, and LifeWatch maintains a world-class monitoring center that includes:

- FDA 510(k) clearance
- Medicare approval for all services
- Joint Commission Accreditation – Ambulatory Care
- 100% HIPAA Compliant with Claredi Certification
- 100% Compliance with 2006 National Patient Safety Standards
- Registered FDA medical device manufacturer, distributor, initial importer, and specification developer

The LifeStar ACT is classified as an ECG Monitor with Arrhythmia Detection. During fiscal year 2007, enrollments on the ACT grew significantly, which attests to our superior technological offering and clinical excellence that LifeWatch provides to our customers.

“While some of our competitors, notably Cardionet, Inc., have recently attempted to portray our device as "just another event recorder", neither the FDA, CMS, nor the doctors agree. Our superior

technology and services are proving that our products and services are the class of the next generation of ambulatory cardiac monitoring systems and services." said Roger Richardson, LifeWatch's President and Chief Operating Officer.

"The rapid growth of the ACT monitoring service has resulted in an expansion of our monitoring facility in Philadelphia. The recently expanded center will support our market penetration, both on a geographical and on a number of physician basis, every day" says Richardson.

LifeWatch is confident that our advanced technologies, clinical excellence, and extensive quality credentials provide the best telemetry monitoring system and caring services for our physicians and their patients.

About LifeWatch Corp.

LifeWatch Corp., through its operating subsidiaries Lifewatch Services, Inc. and LifeWatch Technologies, Inc. (Instromedix) is an independent provider of ambulatory cardiac monitoring services and a manufacturer and distributor of ambulatory cardiac and vital signs monitoring devices in the United States. Its current services are used by physicians primarily to monitor patients who are suspected of having heart rhythm disorders, or cardiac arrhythmias, and its products are used by itself and by others in connection with providing cardiac monitoring services. LifeWatch is a wholly owned subsidiary of Card Guard AG, a leading healthcare technology and solutions provider listed on the Swiss Stock Exchange (CARDG).
